Scope and Purpose of the Course

According to the American Historical Association (AHA), we face a challenge and a responsibility as history educators in contemporary society. “The history taught in classrooms and presented in books and articles too often lacks energy and imagination. As a consequence, many students not only fail to gain a sense of history, they come to dislike it.” The AHA has issued a call to action: “As educational institutions share responsibility for devaluing the past, so also do they have it in their power to restore its value by educating those in their charge to think historically and to use knowledge and understanding of the past to challenge the present and the future.” (See Liberal Learning and the History Major http://www.historians.org/pubs/Free/LiberalLearning.htm)

This course is especially designed for students who are concentrating in social studies and plan to engage in teaching as a career. As an aspiring educator, how will you instill in your students a sense of the value and relevance of thinking historically in the 21st century? How do people learn history? What is distinctive about learning history compared to learning other academic subjects? This course will introduce you to the growing scholarship that addresses the challenges of teaching and learning history as both a subject and a discipline.
Student Learning Outcomes
Upon successful completion of this course students will be able to:

1. Explain the practical and conceptual components of historical thinking and the relevance of historical reasoning for 21st century learners.
2. Use research findings and theory to analyze challenges students encounter in learning to think historically.
3. Apply principles of historical thinking to develop effective lesson plans paying particular attention to the role of primary sources for teaching historical thinking and promoting analytical reading.
4. Evaluate formative and summative assessment strategies based on alignment among specific learning objectives, teaching strategies, and student learning activities.
5. Explain how a lesson plan of the teacher candidate’s original design addresses the scholarship of teaching and learning historical thinking.

Evaluation

Unit 1 Assignment: Principles of Historical Thinking  35%
Unit 2 Assignment: Putting Principles into Practice: Lesson Plan for Historical Thinking  65%

Unit 1 Assignment: Historical Thinking (35%; SLO 1-2)
You will write historical thinking questions for different types of primary source documents and use assigned scholarship (with Turabian style citations) to explain the challenges students face in learning to think historically about these documents.

Unit 2 Assignment: Lesson Plan (65%; SLO 3-5)
Create an inquiry-based lesson plan using primary sources to teach historical thinking on a particular topic. Lesson components include inquiry question, learning outcomes, primary sources, worksheets or other handouts, assessment plan, information literacy activity, and an explanation of the most important ways the lesson addresses historical thinking and 21st century skills. Components of the lesson plan will be developed in sections with due dates throughout unit 2. You will have the opportunity to revise your lesson plan based on instructor feedback and peer review before the final due date. Lessons will be graded based on effectiveness of lesson design for teaching historical thinking.

A note on gauging your mid-semester grade status: I will submit warnings through Starfish after the first six weeks of the semester based on attendance, class preparation, and performance on the Unit 1 draft assignment for students who are at risk of making a grade in the course below the state-mandated grade of C in a course required for licensure.

Course Policies

Participation and Attendance Policy
1. Consistent attendance—this is a seminar, not a traditional lecture course. We will be critically evaluating the content of the readings and practicing the application of analytical skills during each class period. You will not be able to make up for your absences by copying someone else's notes. For this reason, consistent attendance is essential to your learning in this course. Attendance is mandatory. I will take attendance at the beginning of every class. You must attend at least one hour of the class period to be counted for full attendance for the class. If the University is closed for snow you will not, of course, be counted absent. If it snows and the University is open, class will be held as scheduled and attendance counts. In the event that I am unable to attend class due to unforeseen circumstances I will distribute an email message and post an announcement to Bb at least two hours (if possible) before class is scheduled to begin. Documentation for absences will not be collected except in cases where an extended absence may be necessary (for example, hospitalization). There will be a 3% reduction of the
**student's final grade for each absence after the first 3.** Beyond even this penalty, a student who seriously neglects attendance and class preparation risks failing the course. If you are experiencing a personal crisis that requires you to miss more than 2 classes, please let me know *at that time* (not afterwards).

2. Thorough preparation for class—readings must be completed *before* class and assignments must be turned in on time, including any ungraded Discussion Board postings. **Discussion Board participation (like class attendance) is mandatory.** These are ungraded assignments and will not be evaluated in terms of formal writing standards. In teaching terms, Discussion Board assignments are formative assessments that enable me to identify areas of understanding and misunderstanding and allow you to practice your thinking before you are formally graded. **Failure to submit a Discussion Board assignment by the deadline will be counted as a class absence and may also result in a deduction for the grade of a unit assignment,** as specified in instructions provided as the semester unfolds. See the attendance policy stated in the syllabus for the total number of absences you may accumulate without a grade penalty. Discussion Board postings that are off-topic or do not address course materials in a substantive way will not be counted for credit.

3. Regular contributions to class discussions—participation is not formally graded as a specific percentage of the final grade but the success of this course for your learning depends on active intellectual engagement with your peers. Peer review will be an important component of the Team Portfolio process.

**Academic Integrity**
UNCG considers academic dishonesty to be a serious offense. Dishonest behavior in any form, including cheating, plagiarism, deception of effort, and unauthorized assistance, may result in such sanctions as a failing grade on an assignment or failure in the course depending on the nature of the offense. Students must follow the guidelines of the University Policy on Academic Integrity: [http://sa.uncg.edu/handbook/academic-integrity-policy/](http://sa.uncg.edu/handbook/academic-integrity-policy/)

**Electronic Communication**
Students are responsible for checking Blackboard and UNCG email on a regular basis. Students are encouraged to utilize email and other forms of digital communication when interacting with the instructor (lctolber@uncg.edu). When using email, students are to be professional and courteous. Students should also remember email is an asynchronous form of communication. Thus, while a prompt response may be desired, it may not always be possible (especially late at night and on weekends). Students should allow at least 24 hours (48 hours on weekends) for a response. That said, the instructor answers emails in the timeliest fashion possible.

**Late Assignment Penalty**
Meeting deadlines is an essential element of professional behavior. Please note that *unless arrangements have been made well in advance of due dates*, late assignments will be penalized by a **3% reduction in the final grade for every day the assignment is late.** Assignments later than one week will not be accepted for credit without an extremely impressive explanation.
**Course Schedule**

1/13  **Introductions**

**Unit 1: Theoretical Frameworks: Fundamentals of Historical Thinking**

- What is historical thinking and why does it matter?
- Distinguish the different dimensions of historical thinking: disciplinary skills and concepts historians use to study the past.
- What challenges do students encounter in learning to think historically?
- Apply questions to primary sources that effectively target specific dimensions of historical thinking.

1/15  **Varieties of Knowledge: The Futility of Trying to Teach Everything**

**Read:**

1/20  **Paradigm Shifting: Rethinking the Model for Learning History**

**Read:**
