Historical Methods for Social Studies

COURSE GUIDE*

HIS 430/WI/RI

Spring 2016

Prof. L. Tolbert

Office: MHRA 2109

Email: lctolber@uncg.edu

Hours: by appointment gladly given

**Note that this syllabus is subject to change at the discretion of the instructor. Any necessary changes in the syllabus or course schedule will prioritize effectiveness for student learning.*

Course Overview and Learning Outcomes

The teacher licensure standards for content knowledge in social studies mandated by the state of North Carolina** require that teacher candidates must demonstrate depth of content knowledge in “the process of critical inquiry in history and the social sciences used to examine change over time and develop historical perspectives,” including:

- identifying and framing a problem
- using a variety of sources
- using primary and secondary resources
- evaluating the credibility of sources
- putting sources into historical context
- investigating, interpreting, and analyzing multiple viewpoints
- clearly and effectively articulating conclusions

HIS 430 is an introduction to historical thinking and the research process designed to address these historical methods content standards for all social studies licensure candidates. This is not a course about teaching history but it is directly relevant to developing skills necessary to be an effective history teacher. This is a course about how knowledge is created in the discipline of history. We will use a variety of research resources including manuscripts, reference sources, monographs, scholarly journals, the internet, and repositories such as the Library of Congress. A final case study project at the end of the semester will offer the opportunity to synthesize your research skills using materials in the UNCG University Archives. The ultimate goal of the course is to engage in the creative process of original research within the discipline of history.

STUDENT LEARNING OUTCOMES:

Upon successful completion of this course students will be able to demonstrate the following knowledge, skills, and habits of mind:

1. Inquiry and Creativity: Think creatively about different kinds of research questions inspired by primary source documents.
2. Courage and Historical Thinking: Ask interesting questions whose answers you don't know and recognize the kinds of questions that can be addressed by historical research.
3. Analysis: Contextualize primary source documents in different ways; interpret different types of primary sources.
4. Research: Identify and evaluate appropriate scholarly sources for investigating different kinds of research questions. Use research results to improve your questions.
5. Synthesis and communication: Present research findings in a variety of professional formats that offer audiences a clear understanding of the complexity of the topic, and recognize how writing is integral to the research process.
6. Professional Ethics: Practice history with integrity based on the American Historical Association Standards of Professional Conduct:
<http://www.historians.org/pubs/Free/ProfessionalStandards.cfm>
7. Critical Thinking: Use peer review, instructor feedback, self-analysis, and research findings to effectively revise research design and written communication.
8. Collaboration: Work effectively in collaborative teams for peer review to improve research design and communication of research findings at different stages in the research process.

***See*

Evaluation and Grading

Research Lab Exercises	50%
UNCG Archive Project	50%

Lab Exercises (50%; SLO 1-5)

These exercises in real world research problems will focus on evaluating and applying different kinds of resources in the historical research process. The format of these written assignments may vary but in general all assignments must be typed and, when citations are required, historians use Turabian or Chicago Manual of Style (http://www.chicagomanualofstyle.org/tools_citationguide.html). These exercises will build the skills and content you need to complete the UNCG archive case study at the end of the semester. See the course schedule for specific due dates. Specific instructions for the research exercises will be provided in class and posted to Canvas as the semester unfolds.

UNCG University Archive Project (50%; SLO 1-7)

You will use a variety of archival materials in the UNCG University Archives to analyze a student scrapbook produced at Women's College sometime between the 1910s and the 1950s. You will work in teams to develop a research plan for contextualizing your assigned scrapbook within the history of the institution and beyond the institution. The final product will be a research paper that documents both collaboration of the team and individual research contributions. The results of your research will be available for other researchers in University Archives. The final research paper will be evaluated based on overall excellence—including evidence of effective collaboration, the mechanics of standard written English, complexity of analysis, contextualization of evidence, and effectiveness of research bibliography.

Research is a process. This is not the kind of project you can complete successfully the week before the final draft is due. The quality of your final project depends upon the quality and completeness of your work at various stages in the process. The lab exercises are directly related to the development of your research paper. They will help you develop and refine your research questions as the semester unfolds.

A note on gauging your mid-semester grade status: I will submit warnings through Starfish after the first six weeks of the semester based on attendance and performance on lab exercises for students who are at risk of making a grade in the course below the state-mandated grade of C in a course required for licensure.

Course Policies

Participation and Attendance Policy

1. Consistent attendance— Attendance is mandatory. This is a seminar, not a traditional lecture course. We will be critically evaluating the content of the readings and practicing the application of analytical skills during each class period. You will not be able to make up for your absences by copying someone else's notes. For this reason, consistent attendance is essential to your learning in this course. I will take attendance at the beginning of every class. You must attend at least one hour of the class period to be counted for full attendance for the

class. If the University is closed for snow you will not, of course, be counted absent. If it snows and the University is open, class will be held as scheduled and attendance counts. In the event that I am unable to attend class due to unforeseen circumstances I will distribute an email message and post an announcement to Canvas at least two hours (if possible) before class is scheduled to begin. Documentation for absences will not be collected except in cases where an extended absence may be necessary (for example, hospitalization). **There will be a 3% reduction of the student's final grade for each absence after the first 3.** Beyond even this penalty, a student who seriously neglects attendance and class preparation risks failing the course. If you are experiencing a personal crisis that requires you to miss more than 2 classes, please let me know *at that time* (not afterwards). Practice the kind of responsible communication and professional behavior you will be expected to demonstrate as a teacher.

2. Thorough preparation for class—readings must be completed before class and assignments must be turned in on time, including ungraded Discussion Board postings. **Failure to submit Discussion Board postings by the deadline will result in 2 points subtracted from your Lab Exercise average for each skipped Discussion Board assignment.** Postings must be complete and must fully address the question for credit.
3. Regular contributions to class discussions—participation is not formally graded as a specific percentage of the final grade but the success of this course for your learning depends on active intellectual engagement with your peers. Peer review will be integral to development of your archive project.

Academic Integrity

UNCG considers academic dishonesty to be a serious offense. Dishonest behavior in any form, including cheating, plagiarism, deception of effort, and unauthorized assistance, may result in such sanctions as a failing grade on an assignment or failure in the course depending on the nature of the offense. Students must follow the guidelines of the University Policy on Academic Integrity:

<http://sa.uncg.edu/handbook/academic-integrity-policy/>

Electronic Communication

Students are responsible for checking Blackboard and UNCG email on a regular basis. Students are encouraged to utilize email and other forms of digital communication when interacting with the instructor (lctolber@uncg.edu). When using email, students are to be professional and courteous. Students should also remember email is an asynchronous form of communication. Thus, while a prompt response may be desired, it may not always be possible (especially late at night and on weekends). Students should allow at least 24 hours (48 hours on weekends) for a response. That said, the instructor answers emails in the timeliest fashion possible.

Late Assignment Penalty

Meeting deadlines is an essential element of professional behavior. Please note that *unless arrangements have been made well in advance of due dates*, Lab Exercises and Archive Project assignments will be penalized by a **3% reduction in the final assignment grade for every day the assignment is late**. Assignments later than one week will not be accepted for credit without an extremely impressive explanation. Using effective quantitative reasoning, your grade average can recover from an F on an individual assignment more successfully than it can recover from a “0”. It is

better to turn in an incomplete assignment on time than to turn in nothing at all.
